OBJECTIVE

Dedicated full-stack developer with expertise in MERN and Next.js. Passionate about crafting innovative web applications and delivering high-quality, convention-compliant code while efficiently solving complex problems.

SKILLS

- React Js
- Next Js
- Typescript
- Tailwind CSS
- Node Js
- Express Js
- MongoDB
- PostgreSQL
- Git
- Leaflet
- NginX
- Linux

PROJECTS

Farmacie – (Marketplace)

MAY 2023 – PRESENT

An online marketplace connecting farmers, agricultural vendors, and companies for the direct buying and selling of agricultural products. This platform empowers farmers to increase their profits by selling their commodities directly, eliminates intermediaries, and offers vendors and companies a convenient channel to list and sell various agricultural products, including seeds, fertilizers, machinery, and tools.

Technologies: Node js, Express js, PostgreSQL, Next js, Tailwind CSS, Redux, Mantine

Link: http://farmacie.agronomics.pk/

Dashboard – (Analytics & Stats)

OCT 2023 – PRESENT

Developed a comprehensive dashboard for the organization, focused on project analytics and statistics. The dashboard features visual representations of essential data, including land counts displayed on interactive maps created using Leaflet, crop suitability analysis across Pakistan's regions, and real-time mapping of standing crops. Additionally, it provides administrative control and management of various projects and activities related to administration.

Technologies: Next js, PostgreSQL, Tailwind CSS, Leaflet

Link: (only for admin)

Photography and blogs Web app

SEP 2023 – PRESENT

Designed and built dynamic web app for personal photography and blogs, featuring a responsive design with both dark and light themes. It also includes an admin dashboard for the management of photos and blog posts, allowing the admin to easily add and update content.

Technologies: Next js, MongoDB, AWS S3 Tailwind CSS

Instagram Non Followers App
FEB 2023 – FEB 2023

Responsive Web app for Instagram users to identify non-followers and handle pending follow requests without requiring login or credentials. Features dark and light themes.

Technologies: Next js, Tailwind CSS

Link: http://instaguru.vercel.app/

Weather App
NOV 2022 – DEC 2022

This app provides users with up-to-date weather information, including 3-day and 24-hour forecasts, along with other essential weather details.

Technologies: React js (CRA), Bootstrap, Rapid API

EXPERIENCE

Full Stack Developer & Team Lead | Greenage services Rawalpindi
MAY 2023 – PRESENT

As a team lead and full stack developer, I am responsible for overseeing and participating in full stack development projects, including the Marketplace and various other initiatives. Additionally, I actively contribute to DevOps practices within the organization.

Full Stack Developer | Personal Projects
2022 – PRESENT

I'm actively working on various personal projects, including React and Next.js applications, full-stack (MERN) projects, and API integrations. These endeavors aim to enhance my skills, support continuous learning, and foster problem-solving. To view my portfolio, visit MY PORTFOLIO
